Well 20 AF Form 996 and Boring Logs.pdf

Hello,

Here is Well 20 boring log.

Please let Wayne or I know if you have additional
questions.

Subject: RE: KAFB Water Supply Well Info Needed

Sorry for the delay, I will send the info in several
emails, some files are
large. Zeros indicate wells were not in production
during those times or
down for O&M.

I'm missing the Boring Log for the newest production
well #20, will try to
locate and forward

Hi Wayne,

I just left you a message on your voice mail. Just checking on the status of our request for the Kirtland AFB water supply well info. I am getting ready to go on maternity leave. So when you send us the data, could you please send it to Scott Ellinger and Paul Torcoletti. Their email addresses are shown below. If you have any questions about our modeling project, you can contact Scott Ellinger who is actually preparing the model. His phone number is 214-665-8408.

Subject: KAFB Water Supply Well Info Needed

Mr. Bitner,

The U.S. EPA Region 6 is currently developing a groundwater model to assist NMED with determining the fate and transport of ethylene dibromide (EDB) in the aquifer resulting from the KAFB Bulk Fuels Facility Fuel Spill. To make an accurate model, we must incorporate information from all water supply wells within the model boundaries, which includes the KAFB water supply wells. We would like the following information on the KAFB water supply wells. If you have any questions or concerns, please feel free to call or email me. Thank you for your assistance.

Water supply well information needed:

- Well coordinates in latitude-longitude, UTM, or similar coordinate system.
 - Elevations of top and bottom of each well screen.
- If individual wells have multiple screens, please provide top and bottom elevation for each

screen. If screen data can only be reported as depth below ground surface, please also provide the ground surface elevation so that screen data can be converted to elevation units (mean sea level).

- Pumping rate for each well (gallons per minute) and the dates when the pumping rate is applicable. Please report the pumping rates between December 2011 to February 2012 if possible. For any wells that were inactive between the above dates, indicate their inactivity with a pumping rate of 0 gallons per minute and the dates when such wells were inactive.

- Name and phone number of a staff person for any follow up questions.
